

Unlocking Accuracy, Efficiency, and Growth

Document SDKs for Legal Processes

Set a Precedent for

Better Document Workflows

A document SDK (Software Development Kit), is a powerful document processing tool that enables legal professionals to save time and resources with automated form generation, reduce manual errors in legal paperwork, enhance client services, and maintain data privacy.

The Main

Challenges

In The Legal Sector

Law firms deal with large quantities of time-sensitive documents that contain confidential client information, including court documents, forms, and contracts. Errors due to manual processing, improper redaction, and inefficient document generation methods can lead to **fines, delays, privacy breaches, and data disclosures that may impact the integrity of client work.**

To maintain client trust, it's critical to use document processing technology that ensures accuracy, efficiency, and data security.

Where is this pain felt the most?

Forms and Case Filings

Generating repetitive documents can be tedious, resource-intensive, and time-consuming.

Contracts and Agreements

Missing signatures can cause unnecessary back and forth, delaying essential paperwork completion.

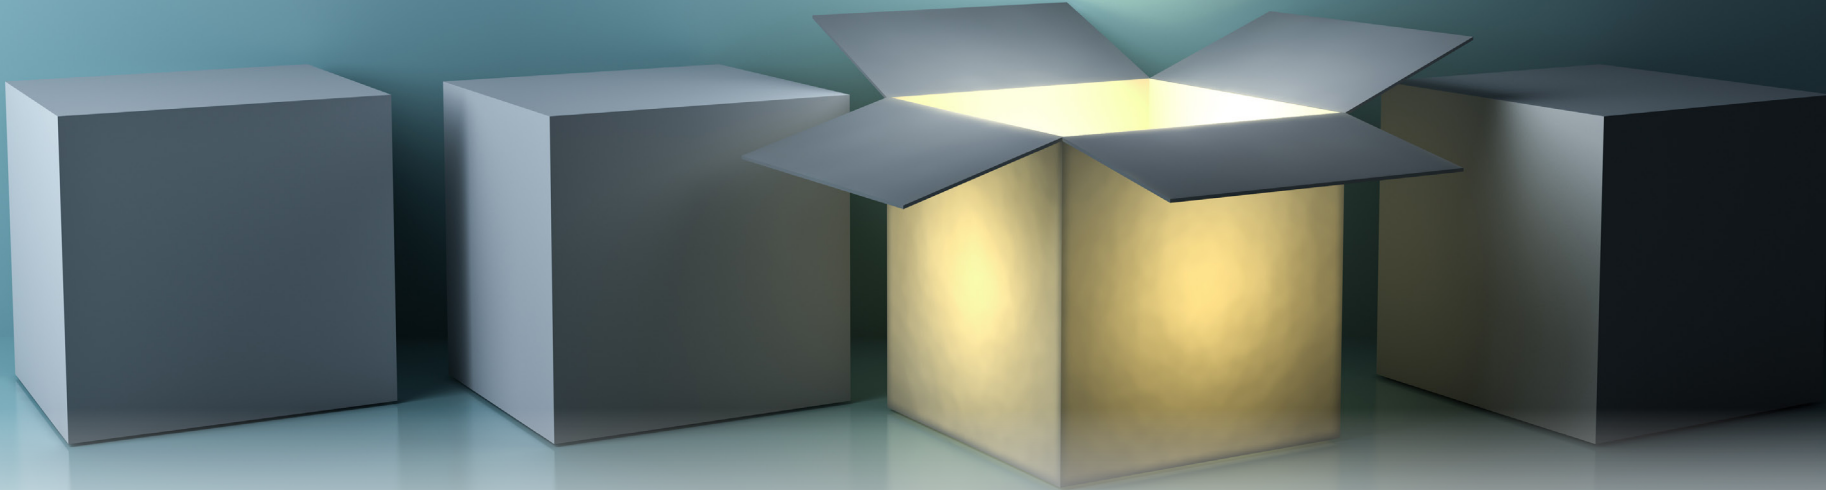

Data Privacy

Accidental disclosure of sensitive information may negatively affect client work.

Client Intake

Getting up to speed on new clients can involve a large amount of paperwork and time.

How Can SDKs Help?

Apryse can help the legal sector by providing solutions for:

 **Automation**
Boost efficiency with automated document creation, conversion, and data extraction.

 **Accuracy**
Ensure all information is accurate and reduce manual errors with automated document processing.

 **Client Services**
Improve the efficiency of document-related tasks and spend more time on valuable client services.

 **Digital Signatures**
Enable all parties to quickly sign critical documents from anywhere.

 **Redaction**
Effectively protect your client data and maintain compliance with permanent redaction.

Why

Apryse

Over Anyone Else?

05

PROVEN BACKING

Supported by renowned investors Silver Smith Capital and Thoma Bravo, with a history serving billions of users, millions of developers, and thousands of global enterprises.

CORE SECURITY

Our SDK, fully embedded in your app code, ensures top-tier data security by eliminating external calls and transmission. This client-side processing maintains industry compliance and keeps user data safe.

RELIABLE EXPERTISE

Apryse SDK, developed in-house for 25 years, guarantees accurate document rendering, conversion, and processing for exceptional reliability.

EXCEPTIONAL SUPPORT

Our responsive **support** and documentation provide help and guidance, empowering you with advanced technology and industry-leading assistance.

PROPRIETARY CUSTOMIZATION

Our PDF SDK offers customization, reliability, and peace of mind, enabling you to prioritize innovation and growth over troubleshooting and maintenance.

“It was an opportunity to leverage those years of expertise and experience, and the breadth of capabilities Apryse brings to the table, so we could achieve the best user experience and make the product increasingly better in a very short amount of time.”

CENGIZ SATIR

SS&C Intralinks SVP of Design & Product Management

SS&C Intralinks is a Virtual Data Room (VDR) provider that empowers M&A teams to securely share sensitive electronic files. **99% of Fortune 1000 companies use Intralinks** to ensure the security of their billion-dollar contracts.

They partnered with Apryse to bring a new web-based redaction tool to market for clients who demand the highest levels of data privacy.

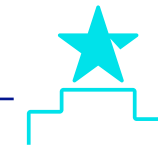

Customer

Case Study

The Challenges

- ⚠️ Eliminate the risks associated with human error in redaction
- ⚠️ Consolidate redaction workflows into a single viewer
- ⚠️ Reduce operational costs and bandwidth consumption
- ⚠️ Maintain high standards for data privacy and compliance
- ⚠️ Accelerate time to market

The Results

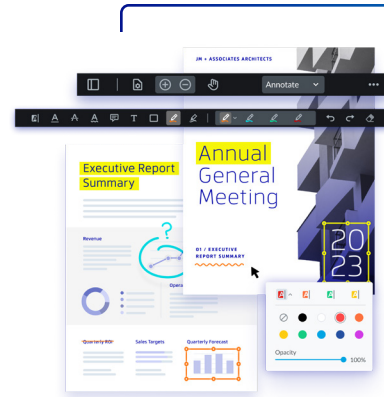

- ★ Implemented an intuitive, secure, and permanent web-based redaction tool
- ★ Centralized document viewing and collaborative redaction into a single universal platform
- ★ Allowed rapid redaction on large files without adding latency
- ★ Enabled local editing without the need to transmit sensitive data over a network
- ★ Deployed web-based redaction features in just 2.5 months start to finish

“It wasn’t just the underlying technology but the ecosystem of Apryse products. With so many options and ways of customizing them, including the WebViewer client and the server-side APIs, that gave us a lot of chances to come up with new ideas and products, and rapidly push those out.” – **Peter Cassin**, *Intralinks Consulting Software Engineer*

Key Features

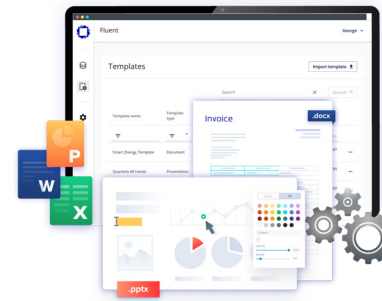

View & Annotate Client-Side

Securely open and annotate a wide range of legal documents, ensuring timely feedback and efficient processing.

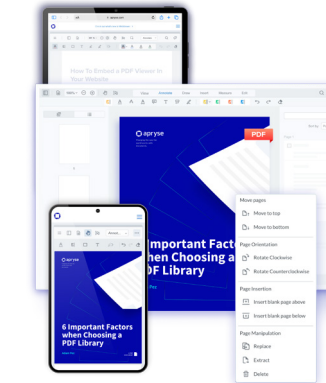

Real-Time Review & Approval

Effectively collaborate in real-time to help speed up the processing of critical documents like regulatory filings.

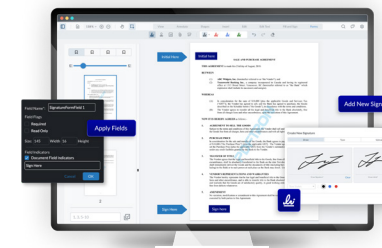

Generate Documents from Data & Templates

Connect data sources to automatically create reports, permit applications, and more.

PDF Text Editing & Manipulation

Enable quick text edits in PDFs with user permissions for secure and compliant document updates.

Digital Signature Workflows

Establish customized document signing workflows to expedite approval processes and ensure timely service delivery.

Intelligent Data Extraction Automation

Maintain information integrity. Extract and process data, text, and tables from scanned PDFs with AI-powered accuracy.
